

Names of the 14 Women Murdered at Ecole Polytechnique

- Anne-Marie Edward, 21, was a first year student in chemical engineering. She loved outdoor sports like skiing, diving and riding and was always surrounded with friends.
- Anne-Marie Lemay, 27, was a fourth year student in mechanical engineering.
- Annie St-Arneault, 23, was a mechanical engineering student from La Tuque, Que., a Laurentian pulp and paper town in the upper St-Maurice river valley. She lived in a small apartment in Montreal. Her friends considered her a fine student. She was killed as she sat listening to a presentation in her last class before graduation. She had a job interview with Alcan Aluminium scheduled for the following day. She had talked about eventually getting married to the man who had been her boyfriend since she was a teenager.
- Annie Turcotte, 21, was in her first year student in engineering materials. She lived with her brother in a small apartment near the university. She was described as gentle and athletic - she was a diver and a swimmer. She went into engineering so she could one day help improve the environment.
- Barbara Daigneault, 22, was to graduate at the end of the year. She was a teaching assistant for her father Pierre Daigneault, a mechanical engineering professor with the city's other French-language engineering school at the University of Quebec at Montreal.
- Barbara Maria Klueznick, 31, was a first-year nursing student. She arrived in Montreal from Poland with her husband in 1987.
- Geneviève Bergeron, 21, was a second year scholarship student in civil engineering who could easily have become a musician instead of an engineer. Her friends and family described her as a happy person. On the last day of her life, Genevieve had gone to the school to work on a project with her friends. She played the clarinet and sang in a professional choir. In her spare time she played basketball and swam.
- Hélène Colgan, 23, was in her final year of mechanical engineering and planned to take her Master's degree. She had three job offers and was leaning towards accepting one from a company based near Toronto.
- Maud Haviernick, 29, was a second year student in engineering materials, a branch of metallurgy, and a graduate in environmental design from the University of Quebec at Montreal.
- Maryse Laganière, 25, was the only non-student killed. She worked in the budget department of the Ecole Polytechnique. She had recently married.

- Maryse Leclair, 23, in fourth-year metallurgy, had a year to go before graduation and was one of the top students in the school. She acted in plays in junior college. She was the first victim whose name was known and she was found by her father, Montreal police Lieut. Pierre Leclair.
- Nathalie Croteau, 23, was in her final year of mechanical engineering and planned to take a two-week vacation in Cancun, Mexico, with H el ene Colgan at the end of the month.
- Sonia Pelletier, 28, was the head of her class and the pride of St-Ulric, Que., her remote birthplace in the Gasp e peninsula. She had five sisters and two brothers. She was to graduate the next day in mechanical engineering and had a job interview lined up for the following week. She was awarded a degree posthumously.
- Michele Richard, 21, of Montreal, was in second-year engineering materials. She was presenting a paper with Haviernick when she was killed.
